

Cayuse has released Cayuse424 version 3.1.

This release incorporates a wide variety of feedback from customers currently using 3.0. Cayuse ensures that the upgrade process will be smooth and transparent and will further enhance the value we get from Cayuse424.

Cayuse now supports two additional federal funding agencies, has made many small usability changes and has addressed many defects in this upcoming release. Some of the higher-level changes and features include:

- Supports applications to AHRQ and the CDC that require submission through grants.gov
- Supports Internet Explorer 7 and Firefox 2.0 (Mozilla)
- A "Print My Proposal" printing option
- Additional warnings and validations for typical usage scenarios
- Performance improvements on many permission operations
- Enhanced profile user interfaces
- Display of linked Profile Names with User Names
